

E032

1. Identification

Product Identifier used on the label

E032

Other Means of identification.

None

Recommended use of the chemical and restrictions on use.

Use as a hydraulic fluid, storage fluid, flushing fluid, lubricant, corrosion prevention, laboratory use. For use in offshore or onshore oil and gas industry and industrial use.

Name, address and telephone numbers of the chemical manufacturer, importer or other responsible party.

Offshore Environmental Oils Ltd
Aspul Court
Moss Industrial Estate
Leigh, Lancashire
WN7 3PT, UK

info@offshore-oils.com

Telephone +44 (0)8452 967751

Fax +44 (0)8452 967752

Emergency telephone number

Telephone +44 (0)8452 967751 (office hours)

Public Health England +44 (0) 344 8920555 (24 hours)

2. Hazard(s) Identification

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

This product is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

GHS Label elements

Hazard Pictograms	None
Signal Word	None
Hazard Statements	None
Precautionary Statements	None
Supplemental Hazard Information	None.

Hazards not otherwise classified.

Physical-Chemical Properties

Contaminated surfaces may be extremely slippery.

High Pressure Applications

Injections through the skin as a result of contact with the product at high pressures constitute a major medical emergency. See notes to physician in section 4 of this safety data sheet.

E032

3. Composition / Information On Ingredients

Mixture

There are no components in this mixture which within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to either health or the environment and hence do not require to be reported in this section.

None of the components currently have occupational exposure limits. Control parameters are listed in section 8.

4. First Aid Measures

Description of first aid measures

General Advice

Seek medical advice if irritation or symptoms persist and show this safety data sheet.

Skin contact

Wash off immediately with plenty of soap and water. Remove contaminated clothing. Seek medical attention if irritation or symptoms persist.

Eye contact

Rinse immediately with plenty of water for 15 minutes holding the eyelids open. Seek medical attention if irritation or symptoms persist.

Inhalation

Move the exposed person to fresh air.

Ingestion

DO NOT INDUCE VOMITING. Never give anything to an unconscious person. If swallowed, seek medical advice immediately and show this container or label.

Protection of First Aiders

No action should be taken without suitable training or which involves any personal risk.

Most important symptoms and effects, both acute and delayed.

See section 11 for detailed information on health effects and symptoms.

Indication of any immediate medical attention and special treatment needed

If swallowed, seek medical advice immediately and show this container or label.

High Pressure Applications

Injections through the skin due to contact with the product at high pressure constitute a major medical emergency. Injuries may not appear serious immediately, but within a few hours tissue can become discoloured, swollen, and painful with extensive subcutaneous necrosis. Surgical exploration should be undertaken without delay. Extensive and thorough debridement of the wound and underlying tissue is necessary to minimise tissue loss and to limit or prevent permanent damage. It should be noted that high pressure may force the product a considerable distance along tissue planes.

5. Fire Fighting Measures

Extinguishing media

Suitable extinguishing media

Use extinguishing media appropriate to the surrounding fire conditions: Carbon Dioxide (CO₂), dry chemical, foam, water fog.

Unsuitable extinguishing media

Do not use solid water stream as it may scatter and spread fire.

E032

Special Hazards arising from the chemical.

Hazardous Combustion Products

Burning produces irritating, toxic and obnoxious fumes including carbon, phosphorous and sulphur oxides.

Special Protective Equipment and precautions for fire-fighters.

Promptly isolate the scene by removing all persons from the incidents vicinity if there is a fire, No action should be taken involving personal risk or without suitable training. Use water spray to cool unopened containers.

Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face piece operating in positive pressure mode and full turnout gear.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

For Non-Emergency Personnel

Contact emergency personnel. No action should be taken without suitable training or involving personal risk. Evacuate surrounding areas and keep unnecessary and unprotected personnel from entering. Ensure adequate ventilation of the working area. Wear suitable protective equipment. Contaminated surfaces will be extremely slippery. Remove all sources of ignition. Do not breathe vapour or mist. Do not touch or walk through spilt material.

For Emergency Responders

Wear a suitable chemical protective suit, gloves and chemical boots. See also information in "For non-emergency personnel".

Environmental precautions

Avoid dispersal of spilt and runoff and contact with soil, drains, sewers or waterways. Prevent further spillage if safe. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil).

Methods and material for containment and cleaning up

Small Spill

Stop leak if possible without risk. Move containers from the spill area. Absorb with inert, absorbent material, transfer to suitable, labelled containers for disposal. Dispose of via a licensed water disposal contractor.

Large Spill

Contact emergency personnel immediately. Stop leak if possible without risk. Move containers from the spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements and confined areas. Collect and contain spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and transfer to suitable, labelled containers for disposal. Dispose of via a licensed water disposal contractor.

Reference to other sections

For personal protective equipment refer to Section 8.

For disposal refer to Section 13.

E032

7. Handling And Storage

Precautions for safe handling

Advice for safe handling

Wear suitable personal protective equipment. Avoid contact with eyes and skin and clothing. Avoid breathing vapours or spray mist. Keep in the original container or an approved alternative made from a compatible material and keep tightly closed when not in use. Do not reuse containers.

Advice on General Occupational Hygiene

Smoking, eating and drinking should be prohibited in areas where this material is handled, stored or processed. Wash thoroughly after use. Contaminated clothing and personal protective equipment should be removed before entering eating areas. Ensure that eyewash stations and chemical safety showers are close to the working location.

Conditions for safe storage, including incompatibilities

Store in correctly labelled containers. Store in a cool, dry, well-ventilated area away from heat and direct sunlight. Keep containers tightly closed until ready for use. Where possible, design the installations in order to avoid accidental emissions of product (due to seal breakage, for example) onto hot casings or electrical contacts. Protect from moisture and frost. Store in accordance with local regulations, away from incompatible materials (see section 10).

Specific end uses

Refer to section 1 and exposure scenarios in annex if applicable.

8. Exposure Controls / Personal Protection

Control Parameters

None of the components currently have workplace exposure limits listed in the OSHA Permissible Exposure Limits (PEL) or American Conference of Government Industrial Hygienists (ACGIH) Threshold Limit Values (TLV)

Derived No effect Level

No DELs available.

Predicated No effect Concentration

No PNECs available.

Appropriate Engineering Controls

Activities involving chemicals should be assessed for their risk to health, to ensure exposure are adequately controlled. Personal protective equipment should be considered after other engineering control measures have been suitably evaluated. Personal protective equipment should conform to the appropriate standards, be kept in good condition and correctly maintained and be suitable for use. Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information your national organisation for standards should be contacted.

Environmental exposure controls.

Emission from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels below their respective threshold limit value.

E032

Individual Protection Measures such as personal protective equipment.

Eye / Face Protection

Safety glasses with side shields are considered minimum protection.

Respiratory protection

Not normally required where there is adequate ventilation to control exposure. In case of insufficient ventilation, use suitable respiratory equipment.

Skin Protection

Hand protection

Wear chemical resistant gloves. Nitrile gloves with a minimum thickness of 0.4mm are recommended. Most gloves provide only a short time of protection before they should be discarded and replaced. Gloves should be chosen in consultation with the supplier / manufacturer and with a full assessment of the working conditions. This information does not replace suitability tests since glove protection varies depending on the conditions under which the product is used.

Body Protection

Use of protective clothing is good industrial practice. Personal protective equipment for the body should be selected based on the task being performed. Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that does not soak through to the skin. Overalls should be washed regularly. When the risk of exposure is high (e.g. if cleaning spillages or when at risk of splashing), chemical resistant aprons and or imperious chemical suits and boots will be required.

Thermal hazards.

May cause thermal burns. Combustion produces irritating, toxic and obnoxious fumes including carbon, sulphur and nitrogen oxides.

9. Physical And Chemical Properties

Information on basic physical and chemical properties

(a) Appearance	Liquid
(b) Odour	Bland
(c) Odour Threshold	No data available
(d) pH	Not applicable
(e) Melting / freezing point	< -30°C
(f) Initial boiling point and boiling range	No data available
(g) Flash Point	>200 °C
(h) Evaporation rate	Below 110 kPa (1.1 Bar)
(i) Flammability (solid, gas)	No data available
(j) Upper / Lower Explosion Limit	No data available
(k) Vapour Pressure	No data available
(l) Vapour density	No data available
(m) Relative density	0.95 gcm ⁻³ @ 20 °C
(n) Water solubility	Insoluble
(o) Partition coefficient n-octanol / water	Not suitable for measurement
(p) Auto ignition temperature.	No data available

E032

(q) Decomposition temperature	No data available
(r) Viscosity	32 cst @ 40 °C
(s) Explosive properties	No data available
(t) Oxidising properties	No data available
(t) Oxidising properties	No data available

Other information

No additional information.

10. Stability And Reactivity

Reactivity

No data available.

Chemical Stability

Stable under normal operating conditions.

Possibility of hazardous reactions

None expected under normal operating conditions.

Conditions to avoid

No specific data.

Incompatible materials

No data available.

Hazardous decomposition products

Stable under normal conditions. Decomposition products may include carbon, phosphorous and sulphur oxides.

11. Toxicological Information

Information on toxicological effects

Information on likely routes of exposure

Routes of anticipated entry: Inhalation, Dermal.

Product Information

Potential Acute Health Effects

Inhalation	No known significant effects or critical hazards.
Skin Contact	No known significant effects or critical hazards.
Eye Contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Inhalation	No known significant effects or critical hazards.
Skin Contact	No known significant effects or critical hazards.
Eye Contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards.

Delayed and immediate effects and also chronic effects from short and long term exposure

Inhalation	No known significant effects or critical hazards.
Skin Contact	No known significant effects or critical hazards.
Eye Contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards.

E032

Potential Chronic Health Effects

General	No known significant effects or critical hazards.
Carcinogenicity	No known significant effects or critical hazards.
Mutagenicity	No known significant effects or critical hazards.
Developmental effects	No known significant effects or critical hazards.
Fertility effects	No known significant effects or critical hazards.
Acute Toxicity	No known significant effects or critical hazards.
Skin Corrosion / Irritation	No known significant effects or critical hazards.
Serious Eye-Damage / Irritation	No known significant effects or critical hazards.
Respiratory or skin sensitisation	No known significant effects or critical hazards.
Germ Cell Mutagenicity	No known significant effects or critical hazards.
Carcinogenicity	No known significant effects or critical hazards.
Reproductive Toxicity	No known significant effects or critical hazards.
Target Organ effects (STOT) – Single Exposure	No known significant effects or critical hazards.
Target Organ effects (STOT) – Repeated Exposure	No known significant effects or critical hazards.
Aspiration Hazard	No known significant effects or critical hazards.

Numerical measures of toxicity.

Acute Toxicity Estimates.

Not available.

The mixture contains no components which are listed in the National Toxicology Program (NTP) Report on Carcinogens (latest edition) or has been found to be a potential carcinogen in the International Agency for Research on Cancer (IARC) Monographs (latest edition), or by OSHA.

12. Ecological Information

Ecotoxicity

All components are classified as non hazardous for the environment.

Persistence and degradability

All components are readily biodegradable.

Bioaccumulative potential

All components are not considered bioaccumulative.

Mobility in soil

Soil / Water partition coefficient (K_{oc}) Not Available.

Mobility Not Available.

Results of PBT and vPvB assessment

All components are not considered to be PBT or vPvB.

Other adverse effects

No known significant effects or critical hazards.

E032

13. Disposal Considerations

Waste Disposal.

The generation of waste should be avoided or minimised when possible. Disposal of surplus and non-recyclable products should be undertaken via a licensed waste disposal contactor. Significant quantities of waste product residues should not be disposed of via the foul sewer. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Empty containers completely. Retain label(s) on container. Dispose of through a licensed disposal. Where possible recycling is preferred to disposal or incineration. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

14. Transport Information

UN Number	Not regulated under DOT, TDG, IMDG or IATA.
UN Proper Shipping Name	Not regulated under DOT, TDG, IMDG or IATA.
Transport hazard class(es)	Not regulated under DOT, TDG, IMDG or IATA.
Packing group	Not regulated under DOT, TDG, IMDG or IATA.
Environmental hazards	Not hazardous.
Special Precautions for user	None.
Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code	Not regulated.

15. Regulatory Information

Safety health and environmental regulations specific for the product in question.

HCS Classification

Not classified as hazardous.

OSHA Specifically regulated substances.

Not applicable to the mixture or its components.

U.S. Federal regulations EPCRA/SARA Right to Know

United States inventory (TSCA 8b)

All components are listed.

SARA 302/304/311/312 extremely hazardous substances

No products were found.

SARA 302/304 emergency planning and notification

No products were found.

SARA 302/304/311/312 hazardous chemicals

No products were found.

SARA 311/312 SDS

No Products were found.

Clean Water Act (CWA) 307

No products were found.

Clean Water Act (CWA) 311

No products were found.

E032

Clean Air Act (CAA) 112 accidental release prevention

No products were found.

Clean Air Act (CAA) 112 regulated flammable substances

No products were found.

Clean Air Act (CAA) 112 regulated toxic substances

No products were found.

SARA 313 Form R – Reporting requirements

This product does not contain any hazardous ingredients at or above regulated thresholds.

SARA 313 Form R – Supplier Notification

This product does not contain any hazardous ingredients at or above regulated thresholds.

SARA 313 notifications must not be detached from the SDS and any copying and redistribution of the SDS shall include copying and redistribution of the notice attached to copies of the SDS subsequently redistributed.

State regulations

Connecticut Carcinogen Reporting

None of the components are listed.

Connecticut Hazardous Material Survey

None of the components are listed.

Florida substances

None of the components are listed.

Illinois Chemical Safety Act

None of the components are listed.

Illinois Toxic Substances Disclosure to Employee Act

None of the components are listed.

Louisiana Reporting

None of the components are listed.

Louisiana Spill

None of the components are listed.

Massachusetts Spill

None of the components are listed.

Massachusetts Substances

None of the components are listed

Michigan Critical Material

None of the components are listed.

Minnesota Hazardous Substances

None of the components are listed.

New Jersey Hazardous Substances

None of the components are listed

New Jersey Spill

None of the components are listed.

New Jersey Toxic Catastrophe Prevention Act

None of the components are listed.

E032

New York Acutely Hazardous Substances

None of the components are listed.

New York Toxic Chemical Release Reporting

None of the components are listed.

Pennsylvania Right To Know Hazardous Substances

None of the components are listed

Rhode Island Hazardous Substances

None of the components are listed.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.
